ContourMed custom breast forms are covered by most private insurance providers.

ContourMed®

The world's  
*premier*  
breast prosthesis  
*technology*

***"ContourMed custom breast forms are just what the doctor ordered."***

ContourMed® breast forms are recommended by doctors and women everywhere. That's because our innovative product lines combine research by nationally-renowned medical professionals with the University of Arkansas for Medical Sciences Cancer Research Center. Decades of rigorous testing and input from breast cancer survivors led to the creation of a breast prosthesis so advanced it received international recognition, winning the prestigious Medical Design Excellence Award.

ContourMed offers post-mastectomy patients a lightweight, custom-fit breast form that alleviates muscle strain – perfect for women with medical and hard-to-fit conditions such as osteoporosis, lymphedema, arthritis, large breasts, chest wall irregularities or failed breast reconstruction.

***"Only the most advanced technology can give such natural results."***

ContourMed forms harness the latest in technology and beautiful design to meet all your lifestyle needs. With our advanced laser scanning technology, ContourMed gives each individual woman a natural, custom fit.

In a matter of minutes, ContourMed's laser imaging technology captures a three-dimensional landscape of your chest anatomy for a custom-designed fit. With three product lines, innovative new materials and countless skin tone and appearance combinations available, ContourMed forms are designed for you – by you.

***"I finally found a breast form that makes me feel better – both physically and emotionally."***

In addition to the medical benefits of ContourMed's custom, lightweight design, you can feel confident getting back to the activities you love. Whether it's playing tennis, swimming, gardening or playing golf, ContourMed forms provide you with long-lasting comfort and security.

At ContourMed, we know that returning to your pre-surgery lifestyle and appearance are important factors in the breast cancer recovery process. And you can feel good about the fact that ContourMed sends a significant portion of each sales dollar to UAMS to improve the lives of survivors and further the search for a cure.

If you're ready to discover how custom breast forms from ContourMed can transform your life, call today or visit our website at [www.contourmed.com](http://www.contourmed.com).

*“ContourMed offers my customers beautiful forms with a custom fit. And the laser scanning technology makes it easy – without the hassles of plaster casting.”*

Kathleen Bazazi, Manager

### ContourMed Breast Prosthetics

ContourMed offers post-mastectomy patients three product lines to fit your unique body shape and help restore your natural look. All of ContourMed’s products were developed with breast cancer survivor input and offer the following benefits:

- Custom-made for each woman using ContourMed’s patented 3-D laser scanning technology
- Mirrors the shape and size of the intact breast to provide symmetry
- Realistic, lifelike appearance that replicates breast anatomy
- Chest wall landscape is captured through laser scanning, so the form fits like a puzzle piece
- No need for surgical mastectomy bra
- Waterproof materials eliminate the need for a special swim form
- 16 skin tone options
- 9 nipple designs, 6 nipple colors
- Washable and hypoallergenic

### ContourMed Classic™

- Fits comfortably to the chest wall
- ContourMed’s original product design
- Lightweight – 60% lighter than traditional off-the-shelf, silicone breast prosthetics
- Breathable, “stay put” backing

### ContourMed Advantage™

- Provides added security for women with active lifestyles
- Adhesive disc and magnetic technology enables the prosthesis to attach comfortably to the chest wall
- Uses nickel-plated magnets and 3M® hypoallergenic adhesive for safe, direct-to-skin contact
- Lightweight – 60% lighter than traditional off-the-shelf, silicone breast prosthetics
- Breathable, “stay put” backing
- Product line was awarded a Medical Design Excellence Award for design innovation

### ContourMed Profile™

- Innovative material replicates human skin, providing a tactile and realistic feel
- Emulates the consistency of human breast tissue
- Mirrors the natural drape and movement of the woman’s intact breast
- Naturally clings to chest wall without fixation devices
- Fortified with vitamin E for skin conditioning

### ContourMed Accessories

- Nickel-plated Magnets\*
- 3M Skin Support Adhesives
- Prosthesis bags and pillows

\*CAUTION: These magnets cannot be used if you have a pacemaker.

*“As a woman your breasts are unique – no two people are the same. The off-the-shelf forms that I had seen were not really shaped like a woman’s natural breast. ContourMed’s scanning technology is amazing and the form feels so good against my skin. It doesn’t make me sweat like the plastic material I had before and it adheres to my chest without feeling sticky.”*

Heather Ammon  
BREAST CANCER SURVIVOR  
PARKER CITY, INDIANA

### ContourMed EasyFit™

- Non-weighted breast form for leisure or sleep wear
- Made with soft, ultra-light foam
- Fits comfortably to chest wall

*“The technology developed at ContourMed is based on many years of research in an effort to maximize benefits to mastectomy patients. This research has produced the finest prosthesis available today – one that provides comfort, function, appearance and well-being to a woman who has experienced a mastectomy.”*
