Sustainability, Energy and Architecture Ali Sayigh 2013-09-25 This unique volume offers insights from renowned experts in energy efficient building from the world over, providing a multi-faceted overview of the state-of-the-art in energy efficient architecture. It opens by defining what constitutes a sustainable building, suggesting bases for sorely needed benchmarks, then explains the most important techniques and tools available to engineers and architects exploring green building technologies. It covers such pivotal issues as daylighting, LED lighting, integrating renewables such as solar thermal and cooling, retrofitting, LEED and similar certification efforts, passive houses, net-zero and close-zero structures, water recycling, and much more. Highlighting best practices for commercial buildings and private homes, in widely varied climates and within vastly different socio-economic contexts, this illustrated reference will guide architects and engineers in making sustainable choices in building materials and methods. Explains the best methods and materials to support energy efficient building Features case studies by experts from a dozen countries, demonstrating how sustainable architecture can be achieved in varied climates and economies Covers both new constructions and retrofitting of existing structures

Materials & Components in Fossil Energy Applications 1980

eAdoption and the Knowledge Economy Paul Cunningham 2004 With 230 articles by a mainly European group of contributors from the fields of broadband and mobility, e-business, e-government, knowledge management, networked organizations, training, and education, among other fields, this 2v reference contains a wealth of material on the diverse issues involved in adopting information technology into business. While much progress has been made in building the Knowledge Economy, many challenges remain. This requires ever-greater transparency of public and private initiatives, whether commercial, legislative, political, social or technical in nature. It is important that human, cultural and technological issues related to eAdoption and the Digital Divide are constantly in the public eye. This book brings together a comprehensive collection of over 230 contributions on commercial, government or societal exploitation of the Internet and ICT, representing cutting edge research from over 30 countries. The issues, applications and case studies presented facilitate knowledge sharing, which is key to addressing global eAdoption issues and the Digital Divide. It can be used to benchmark regional and national developments, avoid previous mistakes and identify potential partners and exploitation opportunities

Flue Gas Desulfurization and Industrial Minerals M. Michael Miller 1993 Contains 4,101 references on FGD [Flue Gas Desulfurization] ... primarily from 1982 through June 1993. Complements the "Flue Gas Desulfurization and Denitrification" bibliography published by the U.S. Dept. of Energy in Jan. 1985. References were located on the Energy, Science and Technology, Pollution Abstracts, and Environmental Bibliography databases. Primarily covers FGD and the use of industrial minerals in the desulfurization process or in by-product utilization and disposal. Emphasizes post-combustion removal of sulfur dioxide through processes such as in-duct injection and wet and dry scrubbing.
