

OMEGA[®] Software

Version 1.4.4 Release Notes

OMEGA Software, version 1.4.4, is an update released in **Summer 2017** which includes enhanced features and fixes for reported issues.

For detailed information on using any of OMEGA's features and capabilities, select Help from the top, right-hand navigation. Help provides a link to the User's Guides as well as links for contacting WillowWood for advise or help.

Additional OMEGA product information can be found on the [OMEGA section of willowwoodco.com](http://www.willowwoodco.com/OMEGA).

1. REQUIREMENTS

OMEGA Software, version 1.4.4, requires Windows 7 Professional (64 bit). Windows 7 (64 bit) and Windows 8 (64 bit) are supported.

2. ADDITIONS

Cranial fabrication partner options have been updated to only include Danmar Products and Orthomerica. Stored shape files with Becker as the selected cranial fabrication partner may be opened and submitted to either Danmar or Orthomerica.

Functionality has been added that, for *future* OMEGA software updates, users will be given the option to install updates immediately or opt to update at a later time.

3. REMOVALS

No major features have been removed.

4. CHANGES

No major changes have been made to existing functionality.

5. FIXES

Minor bug fixes have been made to prevent the loss of data and improve stability and general reliability of the software.
